

TOTAL SOLUTIONS FOR WATERWORKS AND ELECTRICITY MANAGEMENT

For Building and factory administration

Easily / Control / Whole system

Total Solutions for Waterworks Management

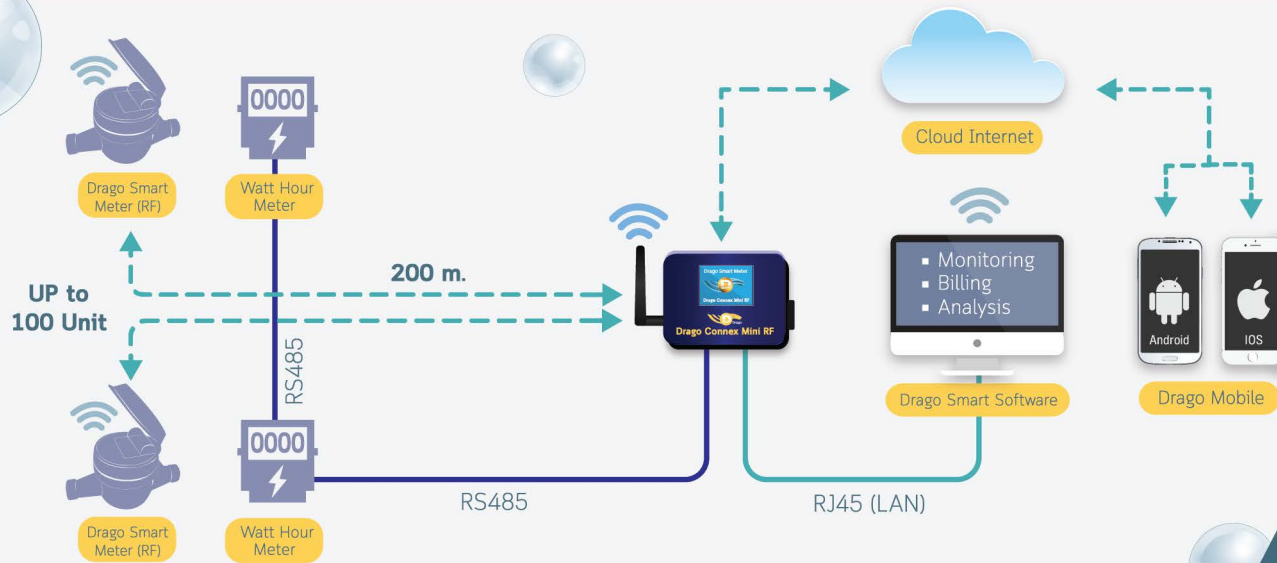

DRAGO

AUTOMATIC METER READING SYSTEM

is total solutions for waterworks and electricity management that allows owners to easily keep track of water and electricity usage via computer / mobile application (compatible with both offline LAN Network and online Cloud Server)

Drago AMR Radio Frequency (RF)

Automatic Water Meter Reading System that Drago Smart Meter (RF) transmits water usage data via radio frequency to Drago Connex Mini RF (data storage) within 200 meters range (no obstruction). Users can easily retrieve real-time data via computer, which gives users convenience, data accuracy, reducing time and human errors.

Enhance quality of life with innovation of technology

Accuracy and real time of water/electricity usage data

Reducing time and human errors in collecting water/electricity usage data

Monitoring abnormality of water/electricity usage

Analysing and Billing water/electricity usage

Retrieve usage data and notifications of abnormality via mobile phone

Drago Smart Software

Owners can easily control waterworks and electricity system of housings, buildings, or factories via computer at one spot. Drago Smart Software (DSS) allows users to monitor any malfunctions/abnormal water usage, analyze water usage data, and billing water usage charges.

Drago Mobile Application

with Drago Mobile Application (Android/iOS), users are secured from malfunction waterworks/electricity system. No matter where you are, the application will promptly notify users once there is any abnormal usage of water, e.g. water leakage.

Suitable for

Chindasook Group
